

ABOUT

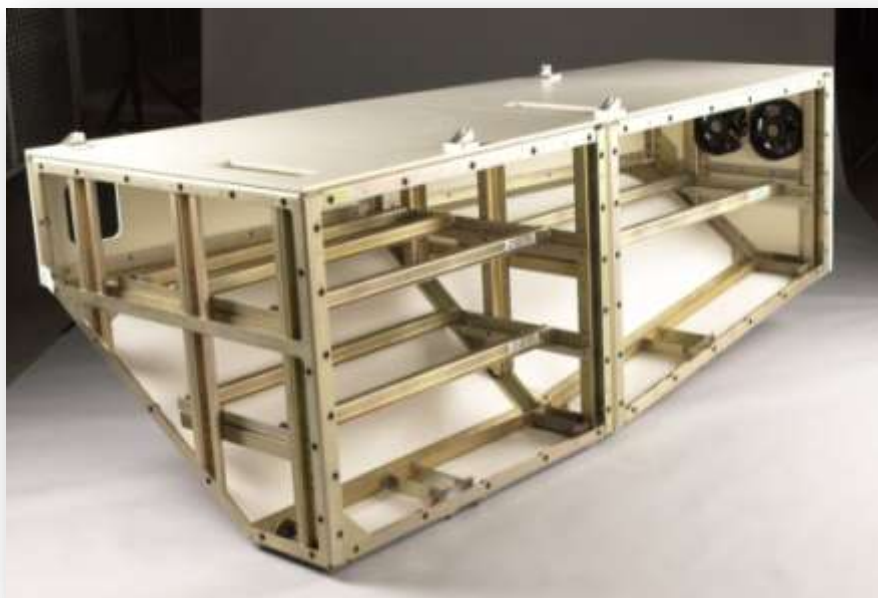

Hollingsead International

Industry Leading Avionics Tray and Racking Systems

Founded in 1959, Hollingsead International, is a full service provider of innovative, high quality products for airlines throughout the world. Hollingsead has always been a leading supplier of avionics integration and mounting solutions patenting the superior design as seen with the Hollingsead torque limiting box extractor. Having developed most of what is now defined in ARINC standards for avionics box alignment Hollingsead is the authority concerning avionics tray and tray hardware design. The Hollingsead line of Box-Mount™ avionics trays has thirteen patents setting the standard for quality and design others strive to follow worldwide.

Today, Hollingsead is one of the few companies to offer complete and seamless avionics racking systems. We design and fabricate a complete range of customized avionics support structures, equipment racks and electrical interface systems for many of the biggest names in the aircraft industry including airframe and avionics manufacturers, modification centers, airlines and both U.S. and foreign governments.

Hollingsead is located in Georgetown, Delaware.

PRODUCTS

Hollingsead International Comprehensive Products and Services

Hollingsead is a major supplier of avionics equipment mounting solutions. The Hollingsead Box-Mount™ avionics trays and Hollingsead custom designed racking systems are the standard for which others compare. The performance and reliability of our products continue to make the Hollingsead name synonymous with quality and customer satisfaction.

Hollingsead provides all of its customers with the benefits of working with a highly dedicated and motivated group of experienced professionals, backed by significant financial strength of the DeCrane

Aerospace Corporation.

Our products include:

- ARINC Trays
- Tray Hardware: Extractors, Front and Rear Hold-downs, Guide Pins etc...
- Avionics Racks and Enclosures

Our services include:

- Tray and Racking System engineering & data development
- Manufacture of installation kits
- Prototype design and manufacture
- 24-hour AOG service

PRODUCTS (cont'd)

Avionics Racks & Enclosures

High Density B 737NG Aft Avionics Rack

The model 2878 Aft Rack replaces the Boeing E6 rack and provides additional space for the latest avionics boxes. It incorporates integrated cooling provisions including two 250 CFM AC fans.

The shelves in this composite rack are fully adjustable and the rack weighs 45 lbs. less than competing racks. This large rack holds over 60 MCU's and 310 lbs. of avionic equipment and is installed without difficulty due to adjustable attachment fittings.

Broadband Internet Equipment Rack

The Hollingsead model 2836 Rack has been Boeing and Airbus approved for the CR IV position on the A330 and A340 aircraft. The rack is installed as line fit equipment at the Airbus factory and interfaces directly with the aircraft cooling system.

This extraordinary rack is manufactured from Nomex and Aluminum composite panels and meets Airbus Fire Standard ABD0031. The rack holds avionic equipment weighing 150 lbs. (68 kg) and includes all cooling provisions as well as trays and disconnect panels.
